

## **Education Council – Student Representative**

**September 2022**

**Term of Office: October 6, 2022–October 5, 2023**

**Winner by Acclamation: Harman Sidhu**

### **Platform Statement**

If elected as a Student Representative, I will do my best to accurately voice ideas from the student body regarding the responsibilities that this position allows me to do, which are approving curriculum content, grading, withdrawals, etc.

Commuting to Langara College for class takes up a lot of time, which could be spent being productive. I would advocate for more online courses, so we could have the option to go to class from the comforts of our own homes and on our own time. This will cut down on commuting time and give us more flexibility in our schedules.

I will put forth the idea of having mandatory grade scaling if a class average is below a certain percent, but not above. For example, if a class average is at 58%, then it should be scaled up to 70%, but if it's at 80%, it won't fall to 70%.

Lastly, I would take suggestions from students on what they think would improve the current state of Langara, concerning the responsibilities I have listed above. I realize this position is to represent the student body and will make it my main obligation to do so. Thank you for reading my statemen
