Prerequisites and Corequisites unavailable, please consult Department for details

Learning Outcomes:

Upon successful completion of this course, students will be able to:

- Identify how scientific research is used by psychologists to investigate how human behaviour is impacted by individual, social and clinical factors
- Differentiate among and apply psychological theories that inform our understanding of motivation, personality, emotion and intelligence.
- Identify and apply classic and contemporary psychological findings related to thinking, language, stress, and health.
- Recognize the findings of classic and/or contemporary social psychology studies and apply these to how people think about, influence, and relate to one another.
- Distinguish symptoms, classification, etiology and treatments of a variety of psychological disorders.
- Identify biological, socio-cultural and psychological approaches to understanding human thought and behaviour
- Analyze and evaluate information using critical thinking, sceptical inquiry and knowledge of the scientific method
- Apply psychological principles in the context of real-life examples.
- Define plagiarism and evaluate the credibility of research sources.
