

Sabrina Chahal**Faculty of Nursing Representative, Education Council**

I am running for Education Council because I believe that strong and engaged faculty voices are essential to shaping academic quality and supporting meaningful change. As a member of the Faculty of Nursing, I am committed to advocating for transparent processes, equitable decision-making, and a collaborative approach that empowers faculty voices.

I believe faculty deserve clarity so they can confidently bring forward ideas that strengthen programs and enhance student learning. My goal is to help maintain an environment where faculty feel informed, valued, and encouraged to participate fully in academic governance.

If elected, I will work with faculty to support them throughout the submission process. I bring experience from my role as Assistant Chair-Placements, my work on the Ministry's BSN Learning Pathway Project, and my contributions as a member of the faculty of nursing for 15 yrs. I have been actively involved in the BSN & NPIC programs, the design and revision of courses across the curriculum, and multiple program reviews for BCCNM and CASN. These experiences have strengthened my understanding of curriculum flow and deepened my commitment to elevating faculty perspectives.

Mario Moniz de Sa**Faculty of Science Representative, Education Council**

I liked being on CRC. I think serving in EdCo would be even more fun. As a new Div chair for Math/Science, being on this committee will give me more of a eagle's eye view of curriculum matters at Langara, something that greatly interests me.
