

SAMPLE COURSE OUTLINE

Course Code, Number, and Title:

WMDD 4940: Native Android App Development

Course Format:

[Course format may vary by instructor. The typical course format would be:]

Lecture 3.0 h + Seminar 0.0 h + Lab. 2.0 h

Credits: 3.0

Transfer Credit: For information, visit bctransferguide.ca

Course Description, Prerequisites, Corequisites:

Currently Android and iOS are the two most popular operating systems on mobile devices. Students focus on creating apps for the Android platform. Topics include implementation of activities, coding intents, use of audio/visual assets, testing and deployment as well as other APIs beyond the core, such as camera, location, and sensors.

Prerequisites: A minimum 'C' grade in WMDD 4930

Registration restricted to students admitted to the PDD in Web and Mobile App Design and Development

Learning Outcomes:

Upon successful completion of this course, students will be able to...

- Decompose a design into a series of connected activities.
- Implement each activity using the Java language and the Android SDK
- Incorporate audio/visual resources into the application.
- Test the application to ensure it works correctly.
- Deploy the native Android application to the device.
- Find, decipher, and use appropriate documentation for a necessary widget, feature, or language construct.

Assessments and Weighting:

Final Exam 20%

Other Assessments

[An example of other assessments might be:]

Midterm Exam: 20%

Assignments: 40%

Project: 20%

Proportion of individual and group work:

Individual: 70%

Group: 30%

Grading System: Letter grade

Specific grading schemes will be detailed in each course section outline.

Passing grade: C

Topics Covered:

[Topics covered may vary by instructor. An example of topics covered might be:]

Android Platform Manifest:

- Declares an app's components.

App Components:

"This Sample Course Outline is for planning purposes only".

SAMPLE COURSE OUTLINE

- Tasks and Activities
- Services
- Content providers
- Broadcast receivers
- Activating Components
- Intents and fragments

UI:

- Views and layouts
- input controls: buttons, text fields, checkboxes, radio buttons, toggle buttons, spinners, pickers
- input events
- output controls: indicators, seek bars
- menus
- notifications
- toasts

Style:

- Themes, colors, layout, branding, typography Designing for multiple devices and versions of operating systems.
- Tablets, tv, car, watch Saving preferences.

Other APIs:

- Animation and Graphics
- Media and Camera
- Location and Sensors
- Connectivity
- Data Storage
- UI Testing and Deployment
- Design patterns (as they arise in Android SDK)

As a student at Langara, you are responsible for familiarizing yourself and complying with the following policies:
